SUMMARY

I am a Software Quality Assurance Engineer with a strong background in both manual and automated testing. My expertise in Agile frameworks allows me to streamline test processes and enhance product reliability. I've demonstrated success in managing the complete testing lifecycle, executing extensive API and UI tests, and driving defect resolution using tools like JIRA. My collaborative approach focuses on delivering high-quality software solutions that meet and exceed customer expectations

EXPERIENCE

Software Quality Assurance Engineer

Light & Wonder, Inc

📅 2022 - Present

- Orchestrated end-to-end testing for high-profile applications, including Player Boutique Live and the Elite Bonusing suite, ensuring market-ready stability
- Managed the full QA lifecycle for 10–15+ concurrent projects, from initial test planning to final release, maintaining 100% requirements coverage
- Executed manual and automated testing across 3 web applications in Agile framework, ensuring timely delivery
- Directed defect management for 150 bugs in JIRA, prioritizing high-severity issues to accelerate development-to-fix cycle
- Authored 500+ test cases and defect reports, ensuring thorough documentation and traceability for compliance and audit readiness
- Engineered 50+ API test cases to validate response accuracy and error handling, ensuring robust communication between backend services
- Verified UI integrity following a major Angular migration, validating complex API integrations and front-end behavior through 500+ targeted tests
- Facilitated 8 Go-Live and UAT sessions as technical liaison, resolving critical issues and ensuring seamless customer transitions
- Partnered with developers to perform root-cause analysis on 30+ complex technical issues, reducing recurring defects and improving code quality

KEY ACHIEVEMENTS

Increased Testing Efficiency

Reduced testing time by 20% through process improvements.

Complete Test Coverage

Achieved 100% test coverage across 15 projects this year.

Defect Reduction Success

Identified 30 root causes, halving recurring defects.

High Test Execution Rate

Executed 500 test cases monthly, maintaining high standards.

EDUCATION

Bachelor of Engineering

National Institute of Engineering

📅 08/2018 - 05/2022

SKILLS

Testing Methodologies

Manual Testing

Automation Testing

Integration Testing

User Acceptance Testing (UAT)

Load Testing

Automation & Performance Tools

Cypress, Apache JMeter

Playwright

API Testing & Tools

REST, Postman, Swagger, JSON

Languages

Python

SQL

Project Management & Platforms:

Agile

JIRA
